Subject index

Ac impedance
Influence of the forming electrolyte on the electrical properties of anodic hafnium oxide films: an ac impedance investigation (Esplandiu et al.) 161
Adlattices
On the anodic oxidation of the Pd(111)*c*(4×2)–CO adlattice in alkaline solution (Berry et al.) 281
Adsorption
Adsorption of inorganic ions on bismuth from constant ionic strength solutions in 2-butanol (Väärtnõu) 247
Alcohol biosensor
Improved alcohol biosensor based on ruthenium-dispersed carbon paste enzyme electrodes (Wang et al.) 113
Aliphatic alcohols
Adsorption of inorganic ions on bismuth from constant ionic strength solutions in 2-butanol (Väärtnõu) 247
Alizarin complexone
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265
Allyl alcohol
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
Aniline
The effect of monomer and acid concentrations on electrochemical polyaniline formation in acetonitrile (Pekmez et al.) 237
Anodic adsorbate stripping
On the quantitative determination of carbon dioxide in air. A new sensor technique using anodic adsorbate stripping (Küver et al.) 255
Anodic hafnium oxide films
Influence of the forming electrolyte on the electrical properties of anodic hafnium oxide films: an ac impedance investigation (Esplandiu et al.) 161
Anodic oxidation
On the anodic oxidation of the Pd(111)*c*(4×2)–CO adlattice in alkaline solution (Berry et al.) 281
Anodic voltammetry
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57

Benzhydrylidenefluorene
Anodic oxidation of benzhydrylidenefluorene: synthesis of a new poly(9,9-disubstituted fluorene) possessing reversible p and n dopings (Rault-Berthelot, Granger) 341
Binding energy
Underpotential deposition of copper on Pd(100): an electron spectroscopy study (Lenz, Solomun) 131
Bioelectrodes
Improved alcohol biosensor based on ruthenium-dispersed carbon paste enzyme electrodes (Wang et al.) 113
Bismuth
Adsorption of inorganic ions on bismuth from constant ionic strength solutions in 2-butanol (Väärtnõu) 247
Buckminsterfullerene
Electrochemical in situ conductivity measurements of C_{60} thin films (Nishizawa et al.) 329

C_3 primary alcohols
DEMS and in-situ FTIR investigations of C_3

primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
Carbon monoxide
Decreases in the inhibition of the electrocatalyzed oxidation of formic acid by carbon monoxide (Schell et al.) 303
Catalysis
The preparation of electrodes modified with isopolymolybdic acid + polyaniline film and its catalytic effects on chlorate ions (Wang et al.) 43
Cathodic decomposition
Cyclic voltammetry and charge accumulation at conducting organic salt enzyme electrodes (Wilde et al.) 19
Charge accumulation
Cyclic voltammetry and charge accumulation at conducting organic salt enzyme electrodes (Wilde et al.) 19
Chemisorption
On the anodic oxidation of the Pd(111)$c(4\times 2)$–CO adlattice in alkaline solution (Berry et al.) 281
Chloro(tetraphenylporphinato)manganese(III)
Influence of solvent dynamics on the heterogeneous kinetics of a reaction with a large inner-shell barrier: chloro(tetraphenylporphinato)manganese(III) reduction (Mu, Schultz) 349
Codeposition
Possible excess tritium production on Pd codeposited with deuterium (Hodko, Bockris) 33
Colorimetry
Electrochemical behaviour of syringaldazine, a colorimetric redox reagent (Hapiot et al.) 225
Composite-plated electrodes
Electro-organic reactions on organic electrodes. Part 18. Electrolysis using composite-plated electrodes. Part VII. Preparation of ultrahydrophobic electrodes and their electrochemical properties (Kunugi et al.) 209
Concentration effects
The effect of monomer and acid concentrations on electrochemical polyaniline formation in acetonitrile (Pekmez et al.) 237
Conductance
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121
Conducting organic salt enzyme electrodes
Cyclic voltammetry and charge accumulation at conducting organic salt enzyme electrodes (Wilde et al.) 19
Corrosion
Cyclic voltammetry and charge accumulation at conducting organic salt enzyme electrodes (Wilde et al.) 19
Characterization of passive layers formed on lead by electrochemical impedance spectroscopy (Varela et al.) 147
CO_2 sensor
On the quantitative determination of carbon dioxide in air. A new sensor technique using anodic adsorbate stripping (Küver et al.) 255
Crystal microbalance
Electrochemical in situ conductivity measurements of C_{60} thin films (Nishizawa et al.) 329
Cyclic voltammetry
Potential-dependent surface segregation in lead + ruthenium pyrochlore $Pb_2Ru_2O_{7-y}$ (Gökağaç, Kennedy) 71
1,2-Cyclohexanedione
Investigation of the reduction of 1,2-cyclohexanedione and methylglyoxal on mercury electrodes under pure kinetic conditions by linear-sweep voltammetry (Ruiz Montoya et al.) 217

Deuterium
Possible excess tritium production on Pd codeposited with deuterium (Hodko, Bockris) 33
Differential capacity
Metal–solvent interactions at the electrode–solution interface. An experimental approach (Borkowska, Jarząbek) 1
Adsorption of inorganic ions on bismuth from constant ionic strength solutions in 2-butanol (Väärtnõu) 247
Dissociation constants
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57

Electrocatalysts
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265
Electrochemical impedance spectroscopy
Characterization of passive layers formed on lead by electrochemical impedance spectroscopy (Varela et al.) 147
Electrochemical quartz
Electrochemical in situ conductivity measurements of C_{60} thin films (Nishizawa et al.) 329
Electrochemical reduction
Investigation of the reduction of 1,2-cyclohexanedione and methylglyoxal on mercury electrodes under pure kinetic conditions by linear-sweep voltammetry (Ruiz Montoya et al.) 217
Electrodeposition
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101
Electrolyte effects
Influence of the forming electrolyte on the electrical properties of anodic hafnium oxide films: an ac impedance investigation (Esplandiu et al.) 161
Electron-transfer behaviour
Electrochemical behaviour of syringaldazine, a colorimetric redox reagent (Hapiot et al.) 225
Electro-oxidation
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
The effect of monomer and acid concentrations on electrochemical polyaniline formation in acetonitrile (Pekmez et al.) 237
Electro-oxidation potentials
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57
Electropolymerization
The preparation of electrodes modified with isopolymolybdic acid + polyaniline film and its catalytic effects on chlorate ions (Wang et al.) 43
The effect of monomer and acid concentrations on electrochemical polyaniline formation in acetonitrile (Pekmez et al.) 237
Electroreduction
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
Electroreduction of molecular oxygen in one 4-electron step on mercury (Heyrovský, Vavřička) 335
Electrosynthesis
Electrosynthesis of polyamino-benzoquinone (PAQ) polymers (Phani et al.) 315
Energy dispersion analysis
Potential-dependent surface segregation in lead + ruthenium pyrochlore $Pb_2Ru_2O_{7-y}$ (Gökağaç, Kennedy) 71
Environmental testing
On the quantitative determination of carbon dioxide in air. A new sensor technique using anodic adsorbate stripping (Küver et al.) 255
Excess tritium
Possible excess tritium production on Pd codeposited with deuterium (Hodko, Bockris) 33

Fe^{3+}
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265
Film structure
Influence of the forming electrolyte on the electrical properties of anodic hafnium oxide films: an ac impedance investigation (Esplandiu et al.) 161
Flow injection assays
Improved alcohol biosensor based on ruthenium-dispersed carbon paste enzyme electrodes (Wang et al.) 113
Formic acid
Decreases in the inhibition of the electrocatalyzed oxidation of formic acid by carbon monoxide (Schell et al.) 303
Fourier transform IR spectroscopy
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in

acid solutions. Part II. Allyl alcohol (Pastor et al.) 81

Free energy
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121

Fuel cells
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177

Glassy carbon
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101

Glassy Carbon electrodes
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101

Glucose sensor
A new glucose sensor made of a Nafion-gel-layer covered carbon paste (Andrieux et al.) 289

Graphite electrodes
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265

Graphite-supported copper oxide electrodes
On-line mass spectroscopic observation of the reduction and oxidation of NO_2^- on graphite-supported copper oxide electrodes in aqueous media (Sunohara et al.) 297

H_2O_2
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265

Inorganic ions
Adsorption of inorganic ions on bismuth from constant ionic strength solutions in 2-butanol (Väärtnõu) 247

Inorganic polynuclear materials
The preparation of electrodes modified with isopolymolybdic acid + polyaniline film and its catalytic effects on chlorate ions (Wang et al.) 43

Ion pairs
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121

Isopolymolybdic acid + polyaniline
The preparation of electrodes modified with isopolymolybdic acid + polyaniline film and its catalytic effects on chlorate ions (Wang et al.) 43

Kinetics
Influence of solvent dynamics on the heterogeneous kinetics of a reaction with a large inner-shell barrier: chloro(tetraphenylporphinato)manganese(III) reduction (Mu, Schultz) 349

Lead
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101
Characterization of passive layers formed on lead by electrochemical impedance spectroscopy (Varela et al.) 147

Lead dioxide
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101

Li + Na carbonate eutectic
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 6. Quantitative analysis of the linear scan

voltammetric curves for the first reduction process at monocrystalline NiO electrodes (Bieniasz, Tomczyk) 195
Linear potential scan voltammetry
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177
Linear scan voltammetry
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 6. Quantitative analysis of the linear scan voltammetric curves for the first reduction process at monocrystalline NiO electrodes (Bieniasz, Tomczyk) 195
Linear-sweep voltammetry
Investigation of the reduction of 1,2-cyclohexanedione and methylglyoxal on mercury electrodes under pure kinetic conditions by linear-sweep voltammetry (Ruiz Montoya et al.) 217

Mercury electrodes
In situ infrared reflection absorption spectra of heptyl viologen adsorbed on a mercury electrode surface (Kitamura et al.) 323
Methylglyoxal
Investigation of the reduction of 1,2-cyclohexanedione and methylglyoxal on mercury electrodes under pure kinetic conditions by linear-sweep voltammetry (Ruiz Montoya et al.) 217
Modified electrodes
The preparation of electrodes modified with isopolymolybdic acid + polyaniline film and its catalytic effects on chlorate ions (Wang et al.) 43

Nafion-gel-layer
A new glucose sensor made of a Nafion-gel-layer covered carbon paste (Andrieux et al.) 289
NiO
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 6. Quantitative analysis of the linear scan voltammetric curves for the first reduction process at monocrystalline NiO electrodes (Bieniasz, Tomczyk) 195
Nitrogen compounds
On-line mass spectroscopic observation of the reduction and oxidation of NO_2^- on graphite-supported copper oxide electrodes in aqueous media (Sunohara et al.) 297
Noble metal electrodes
On-line mass spectroscopic observation of the reduction and oxidation of NO_2^- on graphite-supported copper oxide electrodes in aqueous media (Sunohara et al.) 297

O_2
Coordination of Fe^{3+} by "alizarin complexone" adsorbed on graphite electrodes to produce electrocatalysts for the reduction of O_2 and H_2O_2 (Zhang, Anson) 265
On-line mass spectrometry
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
Organic acids
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57
Organic electrodes
Electro-organic reactions on organic electrodes. Part 18. Electrolysis using composite-plated electrodes. Part VII. Preparation of ultrahydrophobic electrodes and their electrochemical properties (Kunugi et al.) 209
Organic polymer
Anodic oxidation of benzhydrylidenefluorene: synthesis of a new poly(9,9-disubstituted fluorene) possessing reversible p and n dopings (Rault-Berthelot, Granger) 341
Organic solvents
Metal–solvent interactions at the electrode–solution interface. An experimental approach (Borkowska, Jarząbek) 1
Oxidation
Decreases in the inhibition of the electrocatalyzed oxidation of formic acid by carbon monoxide (Schell et al.) 303

Oxidation mechanism
Electrochemical behaviour of syringaldazine, a colorimetric redox reagent (Hapiot et al.) 225
Oxygen electrode reaction
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 6. Quantitative analysis of the linear scan voltammetric curves for the first reduction process at monocrystalline NiO electrodes (Bieniasz, Tomczyk) 195
Oxygen reduction
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177

Palladium
Possible excess tritium production on Pd codeposited with deuterium (Hodko, Bockris) 33
Passive layers
Characterization of passive layers formed on lead by electrochemical impedance spectroscopy (Varela et al.) 147
$Pb_2Ru_2O_{7-y}$
Potential-dependent surface segregation in lead + ruthenium pyrochlore $Pb_2Ru_2O_{7-y}$ (Gökağaç, Kennedy) 71
Pd surface
On the anodic oxidation of the Pd(111)$c(4\times 2)$–CO adlattice in alkaline solution (Berry et al.) 281
pH effects
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57
Polyamino-benzoquinone
Electrosynthesis of polyamino-benzoquinone (PAQ) polymers (Phani et al.) 315
Polypyrrole
Comparative evaluation of electrodeposition of polypyrrole on lead-dioxide-coated glassy carbon and of lead dioxide on polypyrrole-coated glassy carbon electrodes (Velayutham, Noel) 101
Potassium nitrate
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121
Potential-step chronoamperometry
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177
Potentiodynamic oxidation
Influence of the forming electrolyte on the electrical properties of anodic hafnium oxide films: an ac impedance investigation (Esplandiu et al.) 161
Product selectivity
Electro-organic reactions on organic electrodes. Part 18. Electrolysis using composite-plated electrodes. Part VII. Preparation of ultrahydrophobic electrodes and their electrochemical properties (Kunugi et al.) 209

Reaction kinetics
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 5. Linear voltammetric and chronoamperometric data for the reduction processes at NiO monocrystalline electrodes (Tomczyk et al.) 177
Reaction mechanisms
DEMS and in-situ FTIR investigations of C_3 primary alcohols on platinum electrodes in acid solutions. Part II. Allyl alcohol (Pastor et al.) 81
Reduced CO_2
On the quantitative determination of carbon dioxide in air. A new sensor technique using anodic adsorbate stripping (Küver et al.) 255
Reduction
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 6. Quantitative analysis of the linear scan voltammetric curves for the first reduction process at monocrystalline NiO electrodes (Bieniasz, Tomczyk) 195
Influence of solvent dynamics on the heterogeneous kinetics of a reaction with a large inner-shell barrier: chloro(tetraphenylporphinato)manganese(III) reduction (Mu, Schultz) 349

Ruthenium-dispersed graphite
Improved alcohol biosensor based on ruthenium-dispersed carbon paste enzyme electrodes (Wang et al.) 113

Scanning electron microscopy
Potential-dependent surface segregation in lead + ruthenium pyrochlore $Pb_2Ru_2O_{7-y}$ (Gökağaç, Kennedy) 71
Sodium bromide
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121
Solvent dynamics
Influence of solvent dynamics on the heterogeneous kinetics of a reaction with a large inner-shell barrier: chloro(tetraphenylporphinato)manganese(III) reduction (Mu, Schultz) 349
Stranski–Krastanov model
Underpotential deposition of copper on Pd(100): an electron spectroscopy study (Lenz, Solomun) 131
Substituted phenols
Anodic voltammetry of phenol and benzenethiol derivatives. Part 1. Influence of pH on electro-oxidation potentials of substituted phenols and evaluation of pK_a from anodic voltammetry data (Stradins, Hasanli) 57
Surface structure
Underpotential deposition of copper on Pd(100): an electron spectroscopy study (Lenz, Solomun) 131
Syringaldazine
Electrochemical behaviour of syringaldazine, a colorimetric redox reagent (Hapiot et al.) 225

Thermodynamic parameters
Electrochemical behaviour of syringaldazine, a colorimetric redox reagent (Hapiot et al.) 225
Transfer-function analysis
Characterization of passive layers formed on lead by electrochemical impedance spectroscopy (Varela et al.) 147
Tritium
Possible excess tritium production on Pd codeposited with deuterium (Hodko, Bockris) 33

Ultrahydrophobic electrodes
Electro-organic reactions on organic electrodes. Part 18. Electrolysis using composite-plated electrodes. Part VII. Preparation of ultrahydrophobic electrodes and their electrochemical properties (Kunugi et al.) 209

Viologens
In situ infrared reflection absorption spectra of heptyl viologen adsorbed on a mercury electrode surface (Kitamura et al.) 323

Water–sulpholane mixtures
Effect of solvent structure on the transport and thermodynamic properties of electrolyte solutions. Conductance of potassium nitrate and sodium bromide in water + sulpholane mixtures at 25°C (D'Aprano et al.) 121

X-ray proton electroscopy
Potential-dependent surface segregation in lead + ruthenium pyrochlore $Pb_2Ru_2O_{7-y}$ (Gökağaç, Kennedy) 71
